Ribblesdale School
Queens Road
Clitheroe
Lancashire

Subject Leader for Mathematics (Second in Department)

**TLR 2.2 (£5351)
Required from January 2024**

Are you an exceptional, committed and highly motivated teacher ready to take your next steps in leadership?

An exciting opportunity is available to a suitably qualified and experienced candidate to become part of the Mathematics Department leadership team. This role will involve supporting the Curriculum Area Leader in managing our forward-thinking, aspirational and well-resourced mathematics curriculum area. Ribblesdale School's mathematics department is made up of eleven specialist mathematics teachers with a wide range of experience in delivering high quality education to pupils across the age and ability range.

The postholder will be a strong classroom practitioner and an excellent communicator who is able to support colleagues and model good and outstanding practice. As a reflective practitioner, the postholder will have a deep understanding of successful teachers' practice and be ready to utilise lessons learned to further advance classroom practice. He /she will be able to demonstrate the creativity, flexibility, and resilience needed to provide outstanding opportunities for our pupils.

The Mathematics Department is unapologetically ambitious; the team explores research to inform and expand its practice, using new ideas and strategies alongside well-established teaching and learning methodology. We want a leader who shares our innovative approach to teaching and learning and strives to achieve excellent results and maximise pupil progress.

Applications are encouraged from confident, aspirational teachers who will share our passion for high quality pedagogy informed by the latest research. A thirst for championing mathematics both as a subject area and across the whole school curriculum is a must, along with the energy and enthusiasm to continue our drive forward at this exciting time.

Full details of this position can be found on this dedicated link:
